

‘Something out of Nothing’

From Nikole Sherman

I am very new to miniatures, but love to upcycle.

I made a shower from foam core board, and used a cake decorating tool to make it look like shower walls. Acrylic white paint. The shower head is a paperclip, covered button shank and a small screen part I took from my hubbys tool box (not sure what it is). The shower curtain is a paperclip and a piece cut from an old plastic table cloth.
