

‘Something out of Nothing’

From Martha Bates

1:24 scale Plant Stand

The legs of this little plant stand are from a Crape Myrtle tree – they are the seed pods that formed from the flowers from the last summer.

The first picture shows five of them, upside and right-side down. The second picture is a 5/8 inch round wood piece that I purchased years ago in a bag of many. A button could be used instead. Simply glue the legs centered on the bottom of the round, paint and you have a plant stand!
