

Chicken Soup Pre board Kit

Pot is cut from metal tubing using small chop saw. Handles are from jump rings, cut in half...though something a little less than half looks better. Make sure the handles are matched.

Chicken...shape. Add a thin bit of fat to one side. Shape and smooth again. Bake.

Carrots...roll into shape. Use back of exacto blade to make slight dents. Add a touch of green pastel/chalk to the top.

Celery...Cut into SMALL sections going from light to dark gradient. Bend over a pin to shape but leave a little of the lighter end off the pin. Use razor blade to make small divots, length-wise. Flatten out the light end a little bit. Bake on the pin.

Make the kits.
