1/4" scale China Plates

By Jane Hettich

SUPPLIES

- Clear nail polish
- 1/4" circle hole punch

1. Copy the plate designs onto a bright white printer paper. Use the best possible setting available.
2. Coat the plate designs with

clear nail polish, a new bottle works best, and allow the polish to dry. Repeat one or two more times to achieve a nice glaze look on your plate.

3. Using the hole punch carefully punch out each plate. It helps to remove the hole catcher on the punch if it has one so you can see your design as you punch it out.
4. Voila! Beautiful china plates for your mini setting!

Please use the plate designs for personal use only.

You may also obtain copies of these plates from the Whiskers on Kittens website at <http://www.whiskers-on-kittens.com> under "How To". You will need Adobe Acrobat Reader. Use a bright white printer paper and print out at the highest quality resolution possible.
