

## NAME Dollhouse for your Dollhouse

This project was developed by Gaye Brown many years ago as a fundraiser for NAME. On the 30th anniversary for NAME and in honor of Dollhouse month in October, this project is shared with our membership. Enjoy.

1. Cut out pieces from wood or tag.  
For the 1" version, all pieces are cut from 1/16" material except the base which is 3/16" thick and the chimneys which are 1/8" square.

2. Cut out paper parts. Glue large green square on the base top. Remove excess paper with X-Acto.

3. Center and glue NAME logo strip on the long front of the base. Wrap remaining strip around the base. Remove excess.

4. Glue front and sides around the first floor as shown.

5. Glue second floor 7/8" above the first floor.

6. Glue decorative exterior papers on the walls.

7. Center and glue roof pieces on house. Fold and glue green roofing paper on the top.

8. Angle cut chimney wood. Wrap brick paper on top, trim excess paper, and glue on roof.

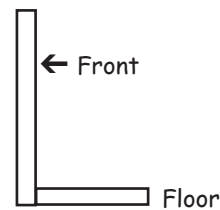

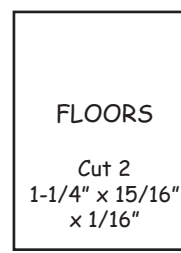

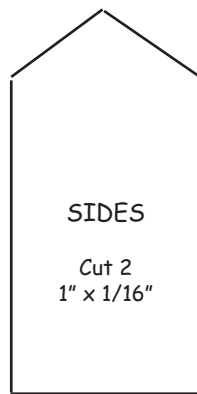

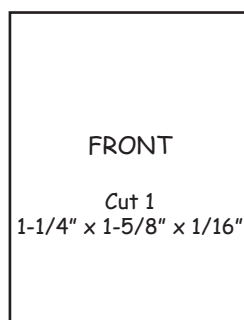

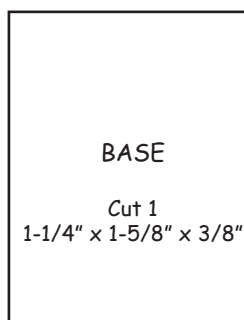

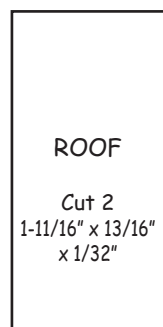

9. Assemble paper dormer. Center and glue on the house.

This house can be reduced 50% for 1/2" scale and reduced again 50% for 1/4" scale. Reduce wood or tag accordingly, using card stock for 1/4" version.

### CHIMNEYS

Cut 2 - 1/8" x 1/8" x 5/16"  
cut on diagonal

### NAME Cutouts
