

Witch/Wizard's Pantry

By Carolyn Eiche
Carolyn's Creations

MATERIALS

- Envirotex Polymer Coating (resin)
- Paper bathroom cups
- 1/8 tsp. measuring spoon
- Paper towel
- Stir sticks
- Resin dyes in the following colors: white opaque, red transparent, green transparent, amber transparent, and pearl white.
- Toothpicks
- Small foil pan
- Red paint
- Black paint
- 21 piece of black sewing thread
- Piece of a gauze pad that's been tea-dyed
- Piece of a dried flower stem
- Tacky glue
- Small pieces of Fimo in the following colors: bordeaux, black, white, green, champagne and flesh
- Sheet of cut-out labels from Gazette
- Various miniature jars, bottles, canisters, cookie jar, bowls or pieces of wood

TOOLS

- Scissors
- Small ceramic tile or heavy duty foil
- Single-edged razor blade or x-acto knife

For this issue I used the idea of items that might be found in a witch or wizard's pantry.

They are items from my imagination and I hope that maybe they will spur you on to think of many other things. Create labels on your computer, like I did, or by hand, and glue them onto anything that you can. Miniature jars, bottles, canisters, blocks of wood painted for boxes, etc. look great on a shelf or table. Let your imagination go.

The following Fimo and resin directions are guidelines only. You may want to just cut out the labels and glue to things without actually making the items. The choice is up to you.

Dragon's Breath Brand, Werewolf Tonic, Witch's Brew Helper, Bat Milk, Poi-son & Cobra Venom labels

Cut out label and glue to jars, a dowel, a block of wood, bottles, etc.

Poisoned Apples

Soften a piece of red Fimo and roll balls approximately 1/4" in diameter. Push in a piece of a dried flower stem and leave it a little longer for a handle.

Pinch the bottom of the ball slightly to shape it like an apple.

Place in foil pan and bake at 250-265 degrees F. for 20 minutes. When cool, cut stems down to size and glue into a bowl. Glue the label to the bowl.

or x-acto knife. Put into a jar, glue on lid and label.

Franken-finger Cookies

Soften a small piece of flesh colored Fimo. Roll several small snakes about 3/8" long. At one end, use a toothpick to mark out

a fingernail. About half-way down the snake press in two lines with x-acto for knuckle. Place in foil pan and bake. Add a little red paint to fingernail or to stump end (for blood) if desired. Place in cookie jar or canister and glue on label.

Bat Wings

Soften a piece of black Fimo and roll several balls about 1/8" in diameter.

Roll into an oval and flatten on tile. Shape into a wing and press in several lines with a toothpick for veins. Bake and when cool place in a jar or canister and glue on label.

Mummy Wrapping

Tea-dye a piece of gauze pad (the kind used for covering wounds).

When dry snip it into little pieces and place them in a glass jar. Glue on label.

Dragon's Liver

Soften a small piece of bordeaux Fimo. Roll into a snake and place in foil pan. Bake as above. When cool, chop into very pieces with the razor blade

Toad Toes

Soften green Fimo and roll balls 3/32" in diameter. Flatten on tile and shape into a triangle. With a toothpick push in

—continued

the bottom about 1/3 of the way in from each end to form toes on the flipper. Press in a line from where you made the toe up to the top of the triangle. Bake and when cool place in a jar or canister and glue on the label.

Vampire Fangs

Soften a piece of white Fimo and roll 1/8" diameter or smaller balls.

Roll each ball into a long pointed teardrop for fang. Flatten slightly and bake in foil pan.

When cool place in jar or canister and glue on label.

Rattlesnake Rattles

Soften a small piece of champagne Fimo and roll balls 3/16-1/8" in diameter. Roll a fat teardrop shape with a rounded point. Flatten the fatter end slightly so you have a cone shape with a rounded top. With a toothpick press two lines running horizontally around the cone to make

three sections on the rattle. Place in pan and bake.

When cool place in jar or canister and glue on label.

Spider Cider

Measure 1/8 tsp. each of resin and hardener in paper bathroom cup according to package directions. Mix well with a stir stick. Add a small amount of amber transparent dye and a touch of white opaque dye to cloud the mixture. With a toothpick place a few drops into a miniature bottle or jar. Snip up the length of black thread for spider parts and gently stir them into resin with toothpick. Add more resin if needed to fill jar. Let harden for 24 hours. If jar has a lid glue it on and also glue on label.

Ectoplasm

Mix resin as above, but this time add pearl white dye. Mix well and place resin in jar or bottle. Let harden and then glue on lid and label.

Monster Mash

Mix resin as above, but this time add green transparent dye and a few touches of white dye. Place in jar or bottle. Let harden and glue on lid and label.

Love Potion #9

Mix resin as above and add white dye with a touch of red dye to make a light pink color. Place in jar or bottle. Let harden and then glue on lid and label.

Newt's Eyes

Soften white Fimo. Roll balls 1/16-1/8" in diameter. Place in foil pan and bake. When cool, use a toothpick to dot each ball with paint for the pupil. You may also add fine lines of red if you want your eyeballs to be blood-shot. Let dry.

Mix resin and put a few drops into jar and add eyeballs. Mix with a toothpick to coat them and add more resin to fill jar to desired height. Let harden and glue on lid and label.

Lizard Gizzards

Mix a bit of black Fimo into bordeaux Fimo to darken it. Roll balls about 1/16" in diameter. Roll into an oval shape and flatten on tile. Push in one side of oval to shape like a kidney bean. Bake and let cool. Mix resin and put a drops in jar.

Add gizzards and mix with a toothpick, add more resin to fill jar to desired height.

Let harden and glue on lid and label.
