

# Work Project

## Bunny Slippers Kit

by Jo Anne Lorenz, Maplewood, Minnesota

**SCALE: 1"**  
**LEVEL: NOVICE**

### MATERIALS

- Two Pieces White Pipe Cleaner—1-1/2" long
- Two 3mm White Pom Pons
- Two Pieces Finest Gauge Florist Wire—3/4" Long
- Small Square of Heavy Weight Fusible Interfacing Approximately 2" x 2"
- Tacky Glue
- Paint—Pink and Black
- Parchment Scrap

### TOOLS

- Scissors
- Fine-Pointed Paint Brush
- Iron

### ASSEMBLY

#### To make ears:

**1** Bend each of the 3/4" pieces of florist wire in half, forming a "V" shape.

**2** Working on parchment, place fusible interfacing with shiny adhesive side up. Position florist wire "V"s on top of interfacing as per illustration.

**3** Fold interfacing over and iron. Be sure to place a scrap of parchment between interfacing and iron. This will protect your iron from glue and your bunny ears from discoloration.

**TIP:** Keep "V" points a little way out of interfacing because this is how you will fasten ears onto slippers.

**4** When interfacing is cool, using patterns, trace and cut out ears and slipper soles.

#### To shape slippers:

**1** Find the halfway point of each of the 1 1/2" pieces of pipe cleaner. Shape toes by bending them around something small and round to form a "U", such as the tip of a glue bottle. Resist the temptation to just bend them in half because the slipper shape will be lost.

**2** Pinch wire ends together at the rear.

**3** Glue pom pons over wire ends. Let dry.

#### Finishing details:

**1** Using fine point of brush dipped in black paint, carefully and sparingly dot on two eyes. Using pink, dot on the nose. Paint a pink stripe down the center of each ear. Let dry.

**2** Glue soles to slippers. Trim if necessary. Let dry.

**3** Twist and bend ears to desired shape. Bend "V"s to fit flat into slipper soles. Saturate "V"s with glue and put in place. Let dry.

### PATTERNS and ILLUSTRATION
