

The Pot of Gold at the End of the Rainbow

You can make this Pot in any scale.
The pot looks best when filled and
I like to make a few extra coins
to pile beside the pot.

Roll a ball the size of the pot
Roll another and flatten to make the base

Roll a worm

Place the worm around the top of the ball

Blend the edges of the base and the worm
to the outside of the ball

Roll several worms
to make the coins

Paint the Pot black
and bake for 45 minutes at 270

Use a single edge blade to cut the coins

Put the cut coins in a small container and add a little Elmers glue

Stir the coins into the glue and pile the coins into the pot

When dry, Paint the coins gold
