

Square in a Square - Amish Quilt Pattern

by Betty Hill, Tri-City Miniature Makers

MATERIALS:

- Tissue paper to copy pattern and to stitch through
- light weight cotton fabrics, main color for center, strips of border, two colors for squares around center
- Needle and thread
- Sheet of Kleenex for batting

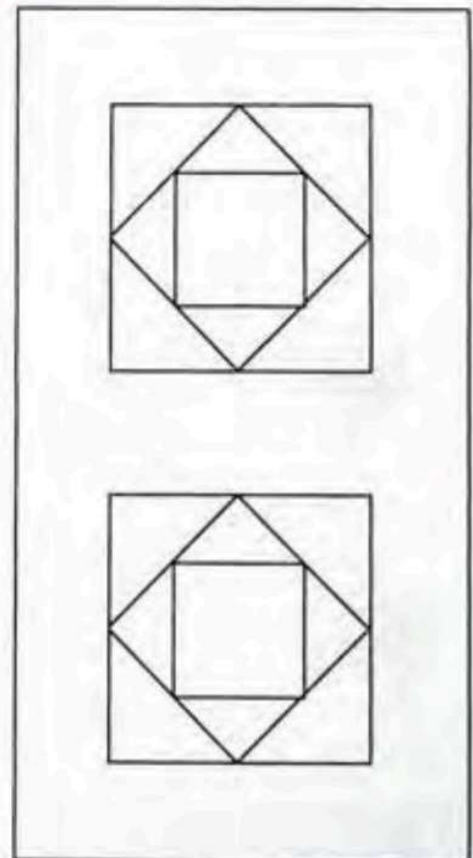

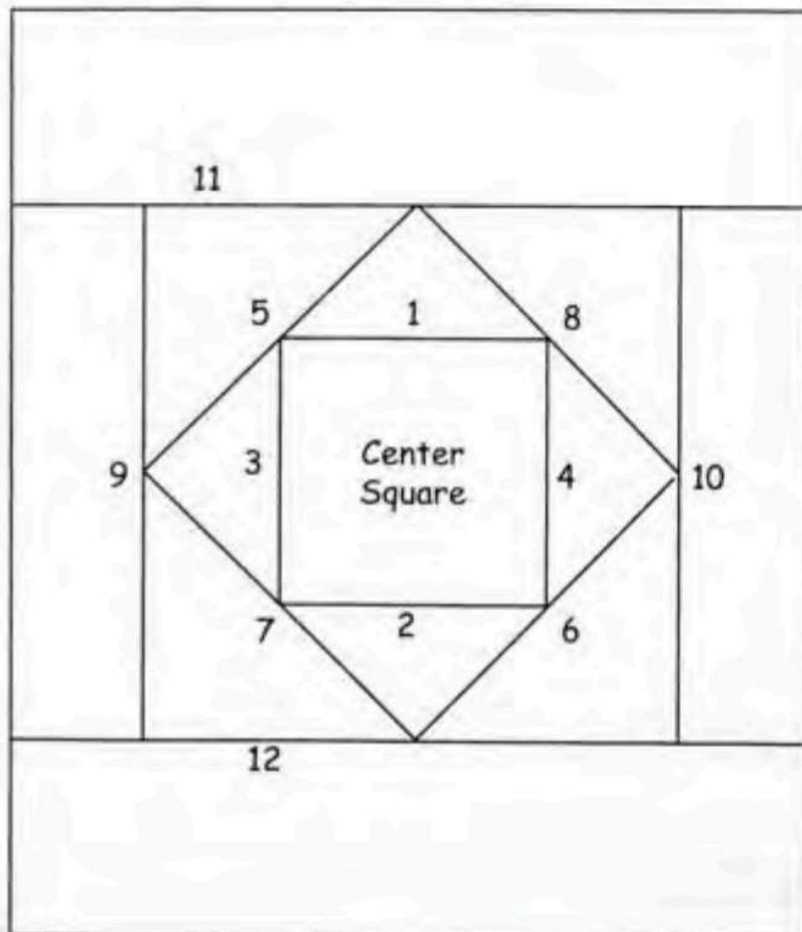

The method used for these quilts is called 'foundation piecing'. These are general instruction. You can find more detailed instructions in any quilt book.

Trace pattern on to tissue paper. The fabric is held to the back - the stitching is done on the tissue front following the lines in order. Line 1 is stitched first, etc.

Use a sheet of Kleenex for batting. Add backing, seam edges. Tie as in an old fashioned quilt.

Assorted quilts made with large square in a square pattern. Quilt on rack made with smaller long pattern.

Smaller pattern makes a quilt which fits over quilt rack with a square on each side.
