

Halloween or Mardi Gras, here is a simple way to make three dimensional masks.

You will need a doll, waxed paper, tissue paper and Mod Podge.

Have fun with these, you can make literally any mask you like.

Start with an inexpensive doll. Remove what you can and cover her face with waxed paper. Paint the waxed paper with Mod Podge

Press in a layer of tissue paper. Paint the tissue with Mod Podge. Add 2 more layers, letting it dry in between. For a funny nose, shape a paper wad and glue it between layers.

Take it off the doll, use a pencil to mark how you want to trim the waste. Paint the face to suit you and add any trims or decorations you like.
